EDUCATION

Babu Banarasi Das Institute Of Technology And Management

July 2025

Bachelor of Technology in Computer Science

SGPA: 7.7

SKILLS

Frontend: Flutter (BLoC, MVVM, Provider, Clean Architecture), React.js, Next.js, Tailwind CSS

Backend: Python, FastAPI, Django, REST APIs, Microservices, Authentication Systems

AI / GenAI: RAG Pipelines, LangChain, CrewAI, Embeddings, Prompt Engineering

Databases: PostgreSQL, MySQL, MongoDB, Firebase, SupaBase, Vector DB (Qdrant)

DevOps / Cloud: Docker, Render Deployment, Cloudinary, Firebase Admin SDK

Languages: Python, Dart, JavaScript, TypeScript, Java, SQL

EXPERIENCE

Software Developer Intern | *Hawan*

Mar 2025 – Dec 2025

- Developed scalable backend services using FastAPI and Python for automation workflows and AI-driven pipelines.
- Built full-stack features using Next.js + React frontend and Python microservices backend.
- Engineered WhatsApp notification automation using Twilio APIs to improve communication workflows.
- Worked on multilingual AI-driven shloka explanation systems using agent-based architecture.

Flutter Developer Intern | *Evening Coders Pvt. Ltd.*

Jun 2024 – Nov 2024

- Built production-grade Flutter mobile applications with scalable REST API integrations.
- Integrated backend services with MongoDB, Firebase, and Stripe payment workflows.
- Improved app performance through optimized API handling and efficient state management.

PROJECTS

EduAI – AI Study Partner (Mobile App) | *Flutter, MVVM, Provider, FastAPI, RAG, Qdrant* (View Project)

- Developed a Flutter-based AI study assistant using MVVM architecture with Provider for scalable state management.
- Designed modular UI and ViewModel layers enabling clean separation of concerns.
- Integrated FastAPI backend for PDF ingestion, semantic search, and AI-powered question answering.
- Implemented chat-based study experience with session persistence and real-time UI updates.

InstaScan – AI Medical Detection App | *Flutter, Provider, FastAPI, Firebase, Cloudinary* (View Project)

- Built a Flutter-based medical diagnostics application for skin cancer and pneumonia detection using AI-powered APIs.
- Designed intuitive mobile UI flows for image upload, prediction visualization, and medical report access using ListView-based layouts.
- Implemented effective in-app PDF report generation containing diagnosis results, confidence scores, and user metadata.
- Integrated Cloudinary to securely store generated medical PDF reports and retrieve shareable cloud URLs.
- Used Cloud Firestore to maintain user-specific collections storing PDF report links and medical history records.
- Enabled users to view and access their past medical reports via Flutter ListView populated from Firestore collections.
- Managed application state and asynchronous API responses using Provider for smooth UI updates and consistency.
- Implemented secure authentication using Firebase Authentication to ensure user-specific data isolation.

CallMate – Smart Calling & Contact Utility App | *Flutter, REST APIs, Firebase*

- Developed Flutter mobile app focused on enhanced calling and contact management workflows.
- Implemented clean Material UI components with smooth navigation and performance optimization.

ACHIEVEMENTS

- Google Cloud Certified via Google Cloud Career Practitioners Campaign.
- Solved 250+ DSA problems on LeetCode.
- Solved 150+ DSA problems on GeeksforGeeks.
